Education is a dynamic process. A sound educational system is one that is responsive to the challenges of a fast changing society. Those who are engaged in educational process must constantly re-examine the academic machinery so that it can prepare the young generation to discharge their obligations towards the community. Text books are an integral part of our academic apparatus; they shape the minds of the readers and mould their personalities. They should bring the young student in integrated contact with the latest developments in thought and help them develop integrated personalities.
