- 4 Read the following paragraph and answer the question below. 10

We give undue importance to our health and the treatment of diseases. A large number of medicines treat only the symptoms of the disease and not the root cause. In fact, the cause of many chronic ailments is still being researched. It is here that Yoga therapy comes to our assistance. Yoga emphasizes treatment of the root cause of an ailment. It works in a slow, subtle and miraculous manner. Modern medicine can claim to save a life at a critical stage, but, for complete recovery and regaining of normal health, one must believe in the efficiency of Yoga therapy.

The Yogic way of life includes a code of ethics, regulations, discipline, combined with prayer and meditation. Even a discussion of these subjects helps one relieve mental tensions and change attitudes. Simple Asanas help to stretch and relax the whole body and release tensions. The sincere practice of Yoga postures is beneficial, for the mind and body.

The continued practice of Yoga has a profound effect on the inner dimensions of life. Yoga aims at developing the mental, physical, spiritual and emotional faculties. Other forms of physical exercises, like aerobics, assure only physical well-being. They have little to do with the development of the soul and mind.
